

VIALS FOR WATERS ALLIANCE™/2690 AUTOSAMPLER

12x32mL Vials are manufactured of Clear, Sun33 Type I, Class A borosilicate glass or Amber, Sun51 Type I, Class B borosilicate glass. The vials have a 40% larger opening providing an increased target area for easier sample preparation and to reduce the chance of bent or broken autosampler needles. The vials are packaged in a resealable ClearPack. Vials have a 10-425 GPI thread.
